You can get it here clicking the Free trial button:
https://appsource.microsoft.com/da/marketplace/apps?search=naveksa&page=1

3. If for an On-premises go to our Help center and download the app.
    a. https://www.dropbox.com/home/NAVEKSA%20TEAM/Teknik/Software/Releases/2023/

    b. Installation is done by the common PowerShell commands exactly like any other BC App.

    c. Please notice you must create yourself as a user, or sign into our Help desk .... before you can download.

4. Insert the license key in the Make to Order setup display, in the section General

5. Run the Setup or go straight to the Make to Order setup display.
    a. Here you can find the detailed explanation of each field:
    https://www.manula.com/manuals/naveksa/installation-and-setup-guide/1/en/topic/maketoorder

6. You are ready to go and work with Make to Order
Use the detailed manual to find out how it works.

https://www.manula.com/manuals/naveksa/make-to-order/1/en/topic/how-to-run-make-to-order

Make to Order- Introduction

Once transactions are made on a production order standard BC does not allow you to change any dates, meaning you cannot use the function Update production order.

Using Make to Order gives you the possibility to change just the date for one single order line (up / down) or for all lines in your order.

Once the date is changed it will reflect in all dates for material- and capacity demand, meaning that you can trust the dates for purchase demand, production and delivery.

Make to Order - How to use

Open the production order for which you want to change date/dates.
A window will open and you can choose action.

For more information please visit the manuals at www.naveksa.com

Make to Order - License renewal.

1. Order a license key to be able to run app for production purposes by writing to .... Naveksa at support@naveksa.com

2. Go to BC and open the MakeToOrder Setup.
